SUMMARY

B.Sc. Computer Science graduate (2025) with hands-on experience building layered, secured web applications using Java, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, and Spring Security on Oracle Database. Skilled in designing RESTful APIs, implementing authentication and authorization, and applying object-oriented and layered architecture principles. Seeking a Java Developer / Spring Boot Developer role.

TECHNICAL SKILLS

Languages: Java, C, C++

Backend: Spring Boot, Spring Framework, Spring MVC, Spring Data JPA, Hibernate, JDBC, Servlets, JSP

Security: Spring Security, Authentication, Authorization

Frontend: HTML5, CSS3, JavaScript

Database: Oracle Database, SQL

Concepts: OOP, MVC Architecture, RESTful APIs, CRUD, Dependency Injection, Bean Validation, Exception Handling, Collections

Tools: Git, GitHub, Maven, IntelliJ IDEA, Eclipse, VS Code, Postman

PROJECT EXPERIENCE

Course Registration System

Java · Spring Boot · Spring MVC · Spring Data JPA · Hibernate · Spring Security · Oracle Database · HTML/CSS/JavaScript · Maven · Lombok

- Designed and developed a full-stack Course Registration System using Spring Boot, Spring MVC, and Spring Data JPA, following a layered architecture (Controller → Service → Repository → Oracle Database).
- Secured REST endpoints with Spring Security, implementing authentication and authorization to restrict access to protected course-registration operations.
- Modeled an Oracle Database schema with Available Course and Enrolled Course entities using JPA, and implemented CRUD operations through JpaRepository.
- Built RESTful endpoints to register students into courses, display available course listings, and view enrolled students along with teacher and duration details.
- Applied Bean Validation for input validation and centralized exception handling; used Spring Dependency Injection and Lombok to reduce boilerplate across entity and service layers.

Quiz Management System

Java · JSP · Servlets · JDBC · Oracle SQL

- Engineered a dynamic web platform enabling users to register, log in, and attempt quizzes online.
- Designed an Oracle Database schema to store questions per category with options and correct answers.
- Developed Servlet-based logic to evaluate user responses in real time, generate score summaries, and manage sessions for a secure, personalized quiz experience.

EDUCATION

B.Sc. Computer Science — GASC, Kuthalam, Annamalai University

Graduated: 2025
