PROFESSIONAL SUMMARY

B.Sc. Computer Science graduate (2025) and Java Full Stack Developer with a strong foundation in core Java and backend engineering. Experienced in designing end-to-end web applications using Spring Boot, Spring MVC, Spring Data JPA, Hibernate, and Oracle Database, following clean, layered architecture and industry best practices. Skilled in developing RESTful APIs, implementing CRUD operations, and applying object-oriented design principles to deliver maintainable, scalable code. Seeking a Java Developer / Spring Boot Developer role to contribute to real-world engineering teams.

TECHNICAL SKILLS

Programming Languages: Java, C, C++

Backend : Spring Boot, Spring Framework, Spring MVC, Spring Data JPA, Hibernate, JDBC, Servlets, JSP

Frontend : HTML5, CSS3, JavaScript

Database : Oracle Database

Concepts : OOP, MVC Architecture, Exception Handling, Collections, Dependency Injection, Bean Validation, RESTful APIs

Tools : Eclipse, IntelliJ IDEA, VS Code, NetBeans, Maven, Git, GitHub, Post Man

PROJECT EXPERIENCE

Course Registration System

Java · Spring Boot · Spring MVC · Spring Data JPA · Hibernate · Oracle Database · HTML/CSS/JavaScript · Maven · Lombok

- Designed and developed a full-stack Course Registration System using Spring Boot, Spring MVC, and Spring Data JPA, following a layered architecture (Controller → Service → Repository → Oracle Database).
- Modeled an Oracle Database schema with Available Course and Enrolled Course entities using JPA, and implemented CRUD operations through JpaRepository.
- Built RESTful endpoints to register students into courses, display available course listings, and view enrolled students along with teacher and duration details.
- Applied Bean Validation for input validation and centralized exception handling to improve application stability and reliability.
- Followed Spring Framework best practices, including Dependency Injection, and used Lombok to reduce boilerplate across entity and service layers.
- Structured the project with 2 database tables, 2 entity classes, and 5 Java classes powering 4 web pages built with HTML, CSS, and JavaScript.

Quiz Management System

Java · JSP · Servlets · JDBC · Oracle SQL

- Engineered a dynamic web platform enabling users to register, log in, and attempt quizzes online.
- Designed an Oracle Database schema to store 50+ questions per category with options and correct answers.
- Developed Servlet-based logic to evaluate user responses in real time and generate detailed score summaries.
- Implemented session management to deliver secure, personalized user experiences throughout the quiz lifecycle.

EDUCATION

B.Sc. Computer Science

GASC, Kuthalam — Annamalai University

Graduated: 2025
